The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/814,014	<b>Applicant(s)</b> WEINBERGER, MICHAEL	
	<b>Examiner</b> Cephia D. Toomer	<b>Art Unit</b> 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This Office action is in response to the amendment filed July 19, 2008 in which claim 11 was amended. The allowability of the claims is withdrawn in view of the newly discovered prior art.

#### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4, 5 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lipper 3,606,609.

3. Lipper teaches a burner for a chafing dish which is adaptable for use with either liquid fuel or solid fuel (see abstract). The solid fuel may be Sterno (gelled fuel) (see col. 1, lines 16-24). The fuel receptacle 20 is adapted to hold liquid alcohol, and comprises a can 22 open only at the upper end. Can 22 is shaped to fit snugly in the base receptacle 10. Can 22 is filled with a wick material 24 which is covered by the metal mesh 26. A rounded, inwardly extending lip 28 holds both the mesh 26 and the wick material 24 in place. The can 22 is hingedly fitted with a substantially semicircular handle 30 to facilitate emplacement in and removal from base receptacle 10. When the fuel receptacle 20 is placed in the base receptacle 10, handle 30 may be swung down to nestle in the space afforded by the annular portion 14 and the faired portion 16.

When the user desires to employ Sterno as a fuel, he simply replaces the fuel receptacle 20 with a suitably sized Sterno can. Lipper teaches the limitations of the claims other than the differences that are discussed below.

Lipper fails to teach that the can is rectangular having the claimed limitations that apply to the rectangular noncombustible housing. However, in *In re Dailey*, 149 USPQ 47 (CCPA 1966), the court held that the configuration of the claimed container was a matter of choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed container was significant.

It would have been obvious to one of ordinary skill in the art to replace the liquid fuel with a solid fuel because Lipper teaches that the fuels are interchangeable(see abstract).
